2016 KAMM Annual Conference
Pre-Conference Day Activity

Elevation Certificates & the CRS
What to Know and Expect

August 22, 2016
1:15 – 4:15 p.m. (CST)
Kentucky Dam Village State Resort Park
Gilbertsville, KY

Presented by: Christina Groves, CFM
ISO/CRS Specialist, ISO Community Hazard Mitigation

3 Hours Professional Development Hours (PDHs), approved by KYBOELS
2.5 Hours CECs for CFMs

Communities participating in the Community Rating System (CRS) are subject to higher standards of review and regulation in order to receive discounts on flood insurance premiums paid into the National Flood Insurance Program (NFIP).

The 2013 CRS Coordinator’s manual changed Elevation Certificate (EC) requirements considerably for CRS communities. As a result, communities and surveyors should pay special attention to ensure completed ECs comply with the new requirements. This workshop will provide an opportunity to discuss what is required of CRS participating communities on the Finished Construction EC.

Who Should Attend?
Local government staff involved in the review and acceptance of Finished Construction ECs, surveyors working within local jurisdictions, other local government staff including: Building Officials, Permitting Supervisors and Clerks, Plans Examiners, Certified Floodplain Managers (CFMs), and CRS Coordinators.

What Will Be Covered?
- Brief introduction to the CRS program
- Discussion about why ECs are considered a higher standard and a required CRS element
- Discussion about how ECs are verified based on the 2013 CRS Coordinators Manual
- Detailed Section-by-Section, Item-by-Item discussion about how to complete the EC
- Discussion of disclaimers seen on some ECs that are not to be accepted by the community
- Discussion on how to work with surveyors to correct ECs
- Tips on maintaining the integrity of ECs will be covered throughout the workshop
