

# 2018 KAMM Annual Conference

Pre-Conference Day Activity

## Golden Pond Planetarium and Elk & Bison Prairie Tour

September 17, 2018

12:30 p.m. (CT)

Land Between the Lakes - Golden Pond

KAMM will provide transportation for 36 attendees or you can drive yourself or in a group. Meet us at 12:30 to board the vans and we will leave promptly at 12:45.

### LBL Elk and Bison Prairie

We will tour through the [LBL Elk and Bison Prairie](#). We will go back in time and cruise through the open prairies like the early 1900s. You can observe the wildlife that roamed more than a century ago from the safety and comfort of our bus.

The Elk and Bison Prairie spans 700 acres of lush, native grasslands that have been enclosed to conserve a natural habitat for the elk and bison that had once disappeared from this region. A 3.5-mile road loops through the prairie, where we may view all sorts of wildlife, including turkeys, various species of birds, small game and a number of prairie mammals.

### Golden Pond Planetarium

Next, we will sit back, relax and watch the stars spin all around at the [Golden Pond Planetarium and Observatory](#) where you'll learn everything you ever wanted to know about constellations and galaxies. You'll find yourself lost in a magical scene where the night sky comes to life. You'll never look at a starry sky quite the same way after viewing it under Golden Pond's 40-foot domed screen; a Konica Minolta Mediaglobe II digital system projects images of stars and planets above you as 360-degree angles bring it all to life.

### The Observatory

You can gain a closer look at the universe through the Golden Pond Observatory's computerized Meade 16-inch Schmidt-Cassegrain Telescope. You'll be amazed at what you find!
