Mapping beyond the MEP on a Shoestring Budget

Dave Herndon, AICP, CSM, CFM
Street Superintendent
What does MEP stand for?!?!?

• Maximum Extent Practicable
Changes to Permit from the 2010 KYG20 Permit (Fact Sheet)......

• Expanded the storm-sewer map from locations of all known major outfalls to a comprehensive storm sewer map which shall include the permittee’s small MS4 system (owned and /or operated by the permittee), including catch basins, pipes, ditches, flood control facilities (retention/detention ponds), post-construction water quality BMPs, and private post-construction water quality BMPs that have been approved by the MS4.
Resources

• Existing outfall and catch basin data
• As-builts
• KYTC Project Archives
• Statewide LiDar (KY Geography Network)
• Street Centerline files
• Best Aerials you can get your hands on
• Google Earth
• Subdivision Plats
Geoprocessing tool that creates a spatial subset of a raster dataset.
