

KAMM's Nature-based Solutions: Into the Green

Announcing Kentucky NBS Summer Webinar Series

Join Us!

The Kentucky Association of Mitigation Managers (KAMM) Nature-based Solutions (NBS) Summer Webinar Series: Into the Green will explore new ways of integrating nature-based solutions into hazard mitigation planning and introduce funding opportunities available to communities in and around the Commonwealth of Kentucky. The Summer Webinar Series will showcase several subject matter experts during each of the four sessions. **The NBS Summer Webinars** are developed with the following partnering agencies and organizations.

Climate change and extreme weather events are compounding the impact of natural hazards such as flooding, landslides, and heat waves. Aging infrastructure in conjunction with stronger more frequent storms are a rising challenge to communities. This “new normal” is constantly testing traditional ideas on hazard mitigation and how communities recover from disasters.

Nature-based solutions or Green Infrastructure can reduce damage from natural hazards as well as (or better than) traditional engineered projects, often at less cost.

What are the Webinar Topics: The webinar series will discuss the whys, whats, and how-tos of utilizing natural solutions as mitigation measures. The webinar series will cover topics like: planning tools, resources, NBS examples, funding sources, regulations and more.

Who Should Attend: The series is geared toward planners, elected officials, engineers, and others working to improve resilience in Metro areas, small cities, suburban, or rural areas around the Commonwealth.

KAMM Nature-Based Solutions Webinars

Tuesday mornings,
10:00 am – Noon (EST)

- July 13
- July 20
- July 27
- August 3

Certificates of Attendance provided.

Please register, follow the link for each webinar!

10:00 am – Noon EDT

Speakers include experts from federal, state, and local agencies and local organizations.
