

KAMM Preconference Day Agenda

Unmasking Mitigation

Monday, September 20, 2021

Integrating Plans and Planning Mechanisms into Hazard Mitigation Plans

8:30 –9:20 am EDT

Presenter: Nick Grinstead, UK/HMGP

Given that the hazard mitigation plan increasingly is sought as a vehicle to integrate other federal agencies' ideas (and requirements) for planning, this presentation intends to discuss effective, efficient ways to integrate other agencies' plans and planning desires into the hazard mitigation plan.

The training will first discuss key components of the hazard mitigation plan: What is fundamentally required in order to meet FEMA's mitigation plan specifications and, thusly, to comply with 44 CFR §201.6. Second, the training will identify examples of other agencies' planning desires/needs. Third, the training will use the fundamentals for compliance with 44 CFR §201.6 to discuss how plan integration can efficiently be implemented. It will particularly focus on FEMA's "Planning-Related Activities" category of funding under its Hazard Mitigation Assistance (HMA) programs.

Designing Hazard Mitigation Plans in an Online World

9:30 –9:55 am EDT

Presenter: Danielle Story, KIPDA

Hazard mitigation plans should serve as a community's guide to understanding local hazard risks and vulnerabilities. However, they often are long (300 + pages), hyper-technical documents that the public and local officials rarely interact with. In 2019, New York City launched the first web-based hazard mitigation plan, which made critical hazard information succinct, navigable, and searchable for the public. It also seamlessly integrated ArcGIS online maps and interactive data visualizations while meeting FEMA requirements.

Inspired by NYC's efforts, the Kentuckiana Regional Planning & Development Agency (KIPDA) is developing one of the first online hazard mitigation plans in FEMA Region IV. In this presentation, Danielle Story, KIPDA's Community & Economic Development Director, will discuss how to create an online, multi-jurisdictional plan and give a preview of the KIPDA HMP website. She will cover topics such as web development tools, online public participation, data visualizations and more.

KAMM Committee Meetings

Committee meetings are 40-minutes so that you can participate in all FOUR committees! Link to the Committee title for agendas.

Flood Mitigation	10:00 – 10:40 am
Emergency Management	10:45– 11:25 am
LUNCH	11:30 am – 12:30 pm
Education and Professional Development	12:30 – 1:10 pm
Awards and Grants	1:15 –1:55 pm

Substantial Damage Management Plan

2:00 – 2:50 pm

Presenters: Christina Groves, ISO & Alex VanPelt, KDOW

Substantial Damage is a part of the floodplain management regulations of all communities that participate in the NFIP. The CRS program has a new creditable element for a plan for managing substantial damage in communities.

A management plan for substantial damage is a detailed community plan, developed before a flood or other hazardous event, that describes the community's process for evaluating damage to buildings, and how the community will address those that have been substantially damaged. In this session, you'll learn about this new credit opportunity in the CRS Program under the 2021 Addendum.

FEMA Public Assistance Mitigation Overview

3:00 – 3:50 pm

Presenter: Cherie Lee, FEMA

Our presentation for Public Assistance Mitigation is an overview of the process to provide an overall understanding of how the program works. We will discuss how additional grant funding can be incorporated into a Public Assistance (PA) Project to increase resiliency to disaster related damages. We will discuss eligibility requirements, codes and standards, cost-effectiveness, and the overall flow of the Public Assistance delivery model as it pertains to PA Mitigation to include Hazard Mitigation Proposal (HMP) implementation. Our presentation will include examples of mitigation that can be applied to each of the five categories of permanent work (C-G).
